

Novus Awarded Contract with The Christie Cancer Centre

Leading maintenance, compliance and decarbonisation contractor Novus Property Solutions has continued its winning streak in the healthcare sector, having recently been awarded a significant measured term contract with The Christie NHS Foundation Trust in Manchester.

This latest contract win comes as the national contractor continues to build its exceptional reputation within the healthcare sector as part of its ambitious five-year growth strategy.

Novus' expert team will carry out a series of internal refurbishments and alterations as well as external works across the hospital, which is one of the largest single site cancer treatment centres in Europe.

The national contractor will also complete a variety of other maintenance and lifecycle improvement works throughout the measured term contract, which will see Novus on site for four years, with the potential to extend the contract for a further two years.

Commenting on this latest contract win, Chris Murphy, Head of Operations at Novus Property Solutions said: "We're delighted to have been awarded this significant contract with the renowned cancer centre The Christie, cementing Novus' position as the go-to contractor for a wide scope of works in the healthcare sector."

"Our team is highly experienced in working in live environments while minimising disruption to both staff and patients, and prioritising health and safety. Our delivery processes will support the patient experience, and our full team will demonstrate sensitivity and compassion for the duration of this contract."
